Remarks/Arguments:

The above Amendments and these Remarks are in reply to the Office Action mailed

May 2, 2007.

Claims 1-67 were pending in the Application prior to the outstanding Office Action. In

the Office Action, the Examiner rejected claims 1-67.

The present Response amends claims 1, 22, 23, 24, 34, 39, 40, 41, 50 and 67, leaving for

the Examiner's present consideration claims 1-67. Reconsideration of the rejections is requested.

The disclosure is objected to because of a summary is not present in the disclosure. A

Brief Summary of the Invention has been added.

Applicant has been advised that should claims 2, 3 and 4 be found allowable, claims 22,

23, 24, 39, 40 and 41 will be objected to under 37 CFR 1.75 as being a substantial duplicate

thereof. To avoid this problem, claims 22 – 24 have been made dependent on claim 1; claims 39-

41 have been made dependent on claim 34.

Claim 67 is rejected under 35 U.S.C. 101 because the claimed invention is directed to

non-statutory subject matter. Claim 67 has been changed into a computer readable storage

medium claim.

Claims 1, 34, 50 and 67 recite the limitation "the representation" which does not have an

antecedent basis. Claims 1, 34, 50 and 67 have been amended to avoid this antecedent basis

problem.

Claims 1-67 are rejected under 35 U.S.C. 102(e) as being anticipated by Shiigi et al. (US

2003/0014442 A1).

Independent claims 1, 18, 34, 50 and 67 include the limitation "Wherein each one of the

controls has an entitlement that can be used to determine whether or not the control is visible

when rendered". Such an entitlement is not shown in Shiigi. Shiigi uses text and tags, but there

is no suggestion that such text or tags is used to determine whether a control is visible when

rendered.

Attorney Docket No.: BEAS-01374US1

JOmalley/BEAS/1374/01374US1/05.02.07_OA_Reply

16

Independent claims 1, 50 and 67 have the further limitation that "one of the set of

controls can communicate with another of the set of controls". This is not shown in Shiigi.

Shiigi shows object reuse, but this is not the same as communication between controls.

In light of the above, it is respectfully submitted that all of the claims now pending in the

subject patent application should be allowable, and a Notice of Allowance is requested. The

Examiner is respectfully requested to telephone the undersigned if he can assist in any way in

expediting issuance of a patent.

The Commissioner is authorized to charge any underpayment or credit any overpayment

to Deposit Account No. 06-1325 for any matter in connection with this response, including any

fee for extension of time, which may be required.

Respectfully submitted,

Date: June 26, 2007
